- Good working knowledge of JavaScript, HTML5 , CSS, Bootstrap.
- Good Understanding of selenium.
- Excellent knowledge of Java with oops concepts.
- Working knowledge various os like windows and ubuntu.
- Good working knowledge of MySQL.
- Basic knowledge of image authoring tool, be able to crop, resize, or perform all small adjustments on an image.

PROJECTS

- **Traffic Signal Synchronisation and Optimization By Using Node Theory**
In this project, we develop the system for traffic management with the help of Arduino mega and a web-based application. In this project, we use IR Sensors for detecting the density of the traffic with the help of that More traffic lanes can get more time as a 15sec other than that if traffic density is less we have set default time as 5sec. other than that we Synchronisation the two or more traffic signals two control the traffic flow. A traffic police officer can also handle the traffic with the help of a web-based application from any device.

Technology- HTML, CSS, Java Servlet Page, Embedded C, MySQL, UI design.
- **Personal Portfolio**
I have designed and develop my portfolio Website by using Html, CSS, Js, Bootstrap, jQuery. In this first, I am designing a website by using Html, and CSS. After that, I just re-design my first website which is responsive for all screen sizes and more adaptive.
